

Business Problem

Knovista Technologies generates leads through multiple marketing channels and manages them through a team of employees. However, the organization faced challenges in understanding:

- Which marketing channels generate the highest return on investment (ROI)?
- Which employees contribute most effectively to lead conversion?
- How sales and conversion performance change over time?
- Where excessive marketing costs and operational inefficiencies exist?

Without a centralized reporting system, decision-making becomes slower and less effective. This project solves this problem by building an interactive Power BI dashboard for real-time business analysis.

Project Objectives

The primary objectives of this project were:

1. **Analyze lead generation performance** across different marketing sources.
 2. **Measure conversion efficiency** to identify high-performing channels.
 3. **Evaluate employee productivity** and compare individual performance.
 4. **Track monthly sales and conversion trends** using time-series analysis.
 5. **Monitor key business KPIs** such as total cost, total leads, and successful conversions.
 6. **Identify cost optimization opportunities** to improve business profitability.
 7. **Build an interactive dashboard** for data-driven strategic decision-making.
-

Conclusions / Key Insights

Marketing Insights

- Instagram and File Upload consume most of the marketing budget.
 - Neodove Dial Pad shows strong conversion efficiency with lower cost.
 - Move Lead is underperforming and requires budget review.
-

Employee Insights

- Top employees contribute significantly to overall conversions.
- Large performance variation exists across employees.

- Training and mentoring programs are needed for low performers.
-

Time Series Insights

- Sales show clear monthly/seasonal variation.
 - June recorded highest cost but lowest conversion efficiency.
 - Business performance is strongly influenced by time-based trends.
-

Business Impact

- Improved visibility into business performance.
 - Faster strategic decision-making.
 - Better budget allocation opportunities.
 - Enhanced employee performance monitoring.
 - Strong foundation for future predictive analytics.
-

Final Insight

This dashboard enables Knovista Technologies to identify what works best, who performs best, and when performance changes—turning raw data into actionable business intelligence.
